

Sarthak Bankar

Data Scientist | Python Developer | ML Engineer

Professional Summary

Python Developer and AI & Data Science Engineer with strong core Python knowledge and hands-on experience across multiple libraries for data analysis, visualization, automation, and application development. Skilled in backend development, deployment workflows, research-oriented problem solving, and building interactive digital solutions

Education

Higher Education – Tip Top Convent, Nagpur

B. Tech – Artificial Intelligence & Data Science,
Priyadarshini College of Engineering
Currently Pursuing – 4th Year

Projects / Experience

MAHATROPACON Conference Portal:

Developed an digital conference platform for DMMC, Nagpur, enabling delegate registration, abstract workflows, admin management, and a modern responsive UI.

Habit Streak Tracker (Flutter App): Developed a simple streak-tracking mobile application using Flutter and Dart with dark mode, local storage, animations, streak visualization, and premium UI design.

Research/Review Paper: Analyzed the PIMA diabetes database and performed EDA and improved the ML models accuracy by mixing models and data augmentation

Data Science Project: - Google Trends gives us an estimate of search volume for specific terms. This project explores whether search popularity relates to other types of data.

Technical Skills

Python, HTML, CSS, Data Science, Data Visualization, Artificial Intelligence, Machine Learning, ChatGPT, Gemini, Grok, Automation, Excel, Web Development, Problem Solving, Creativity, SQL, GitHub, VS code, Database Management, Python Libraries, APIs, Deep Learning

Languages

Marathi: - Full proficiency

Hindi: - Full proficiency

English: - Full proficiency

Garman: - A1 level proficiency

Career Objective

To explore the new and rapid growing technologies like artificial intelligence and machine learning, participate in research fields along with developing innovative and creative ideas.
